EXPERIENCE

Klaviyo

Jan. 2026 – Present

Software Engineer Co-op, Full Stack/Mobile

Boston, MA

- Built mobile messaging features with Mobile App Marketing teams, driving 3 major initiatives: iOS background notifications, sign-up form display prioritization, and automated Android test-app validation.
- Contributed to Klaviyo's mobile SDK ecosystem across 4 platforms—native iOS and Android, React Native, and helped launch Flutter—enabling cross-platform notification handling and feature parity for enterprise customers.
- Owned end-to-end implementation across Klaviyo.com, client-side web modules, internal and public APIs, driving adoption across 53+ customers sending 26k+ notifications, representing nearly \$500k in monthly recurring revenue.
- Built AI-powered developer tooling and testing infrastructure, including Claude skills and autonomous mobile testing workflows that automated 32 test cases across Analytics, Push, and In-App Forms.

Beema Health

Jul. 2025 – Sep. 2025

Software Engineer

Remote

- Deployed a clinic management platform with Next.js and GoFiber on Oracle Cloud Infrastructure, serving 45+ patients across 3 pediatric centers, processing 200+ monthly sessions.
- Transitioned the system from single-tenant to secure multi-tenant design, implementing strict data isolation and HIPAA-equivalent compliance to enable international expansion.
- Optimized PostgreSQL database performance with indexed queries, connection pooling, and normalized schema handling 15+ interconnected entity types (patients, guardians, staff, sessions, patient goals, assessments).

Verizon Communications (NExT)

Jan. 2025 – Jul. 2025

Software Engineer Co-op

Boston, MA

- Architected a React/FastAPI application with Verizon's AI & Data team deployed on AWS (ECS, Lambda, RDS, VPCs) via Terraform, enabling visualization of sentiment and network data.
- Implemented a machine learning pipeline (sentiment analysis, anomaly detection, KeyBERT topic modeling) across 5+ sources that reveal geospatial churn hotspots across all 50 US states and 4 territories.
- Automated ETL workflows for data collection, transformation, and analysis, establishing trend monitoring capabilities that flag emerging issues across diverse data streams, addressing \$150M+ in annual churn revenue loss.

EDUCATION

Northeastern University, Boston, MA

3.8/4.0 – Dean's List

Bachelor of Science in Computer Science, Honors

Sep. 2023 – Dec. 2026

Relevant Courses: Artificial Intelligence, SWE, Algorithms, OOD, Systems, ML & Data Mining I, Database Design

Honors: Top 10 Finalist SiliconXL Launchathon, Best Use of MongoDB Atlas HackBeanpot24, VEX Worlds Division Champion

TECHNICAL SKILLS

Languages: Python, TypeScript, Go, Java, JavaScript

Frontend: React, Next.js, Astro, Vue, Tailwind, TanStack Query, Framer Motion

Backend: GoFiber, Express, Django, FastAPI, Flask, PostgreSQL, MySQL, MongoDB, Drizzle, SQLAlchemy, OpenAPI

Mobile: React Native, Flutter (Dart), Kotlin, Swift, Expo

DevOps & Infrastructure: AWS, Azure, OCI, Docker, Git, Terraform, Pulumi, Buildkite, CI/CD, Linux

CAMPUS EXPERIENCE

Generate Product Development

Sep. 2024 – Present

Technical Lead | Toggo, The Special Standard, Dearly, Platnm

Boston, MA

- Lead cross-functional teams of 11–14 designers and engineers in an Agile environment to build a series of social media applications for clients using TypeScript, React Native, Go, PostgreSQL, Redis, AWS, Hono, and Fiber.
- Own technical architecture and execution, defining product roadmap, conducting weekly code reviews, writing documentation, and delivering the application on schedule for client handoff.
- Architect backend systems and database schemas powering 15+ real-time collaborative features including polls, RSVPs, comments, reactions, activity feeds, push notifications, file uploads, media processing, and WebSocket synchronization.
- Build reusable frontend systems and production infrastructure, developing 40+ components, OpenAPI-generated API clients, Dockerized deployments, and automated testing frameworks.

Foreign Languages: Malayalam (Spoken), Spanish (Conversational), Hindi (Beginner), Arabic (Beginner)
